Defining Our ENH 'Neighbourhood'

Neighbourhoods in ENH

- Not defined by fixed geography or size — can be a few streets or tens of thousands.
- Shaped by how residents see themselves: local relationships, geography, history, and shared experiences.

East and North Hertfordshire Health and Care Partnership (ENH HCP) provides health and care services to around 633,000 residents.

The area is divided into six localities, each supported by an Integrated Neighbourhood Team (INT). Together, these localities include 12 Primary Care Networks (PCNs), delivering primary and pharmacy services through 47 GP practices—each serving populations of 30,000 to 50,000 people.

INTs	Primary Care Network	Local and District Council	Acute Trust

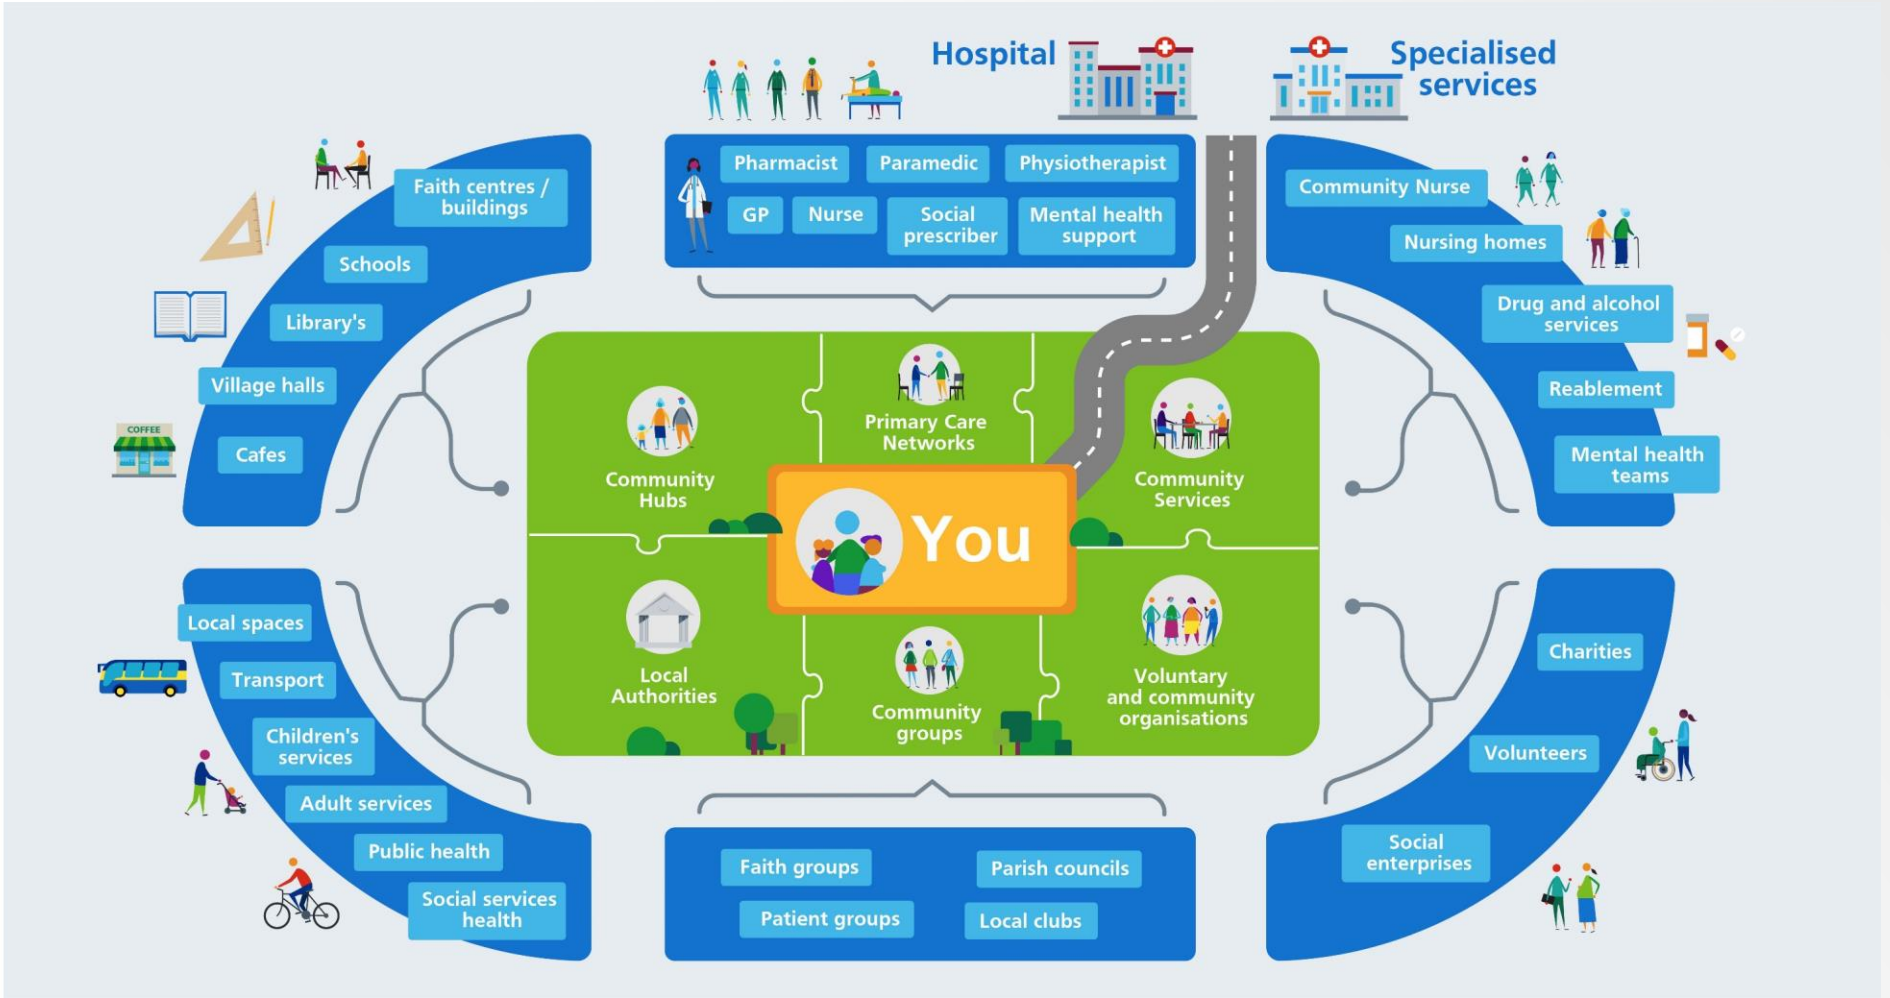
Neighbourhood Vision



Strategic objectives and priorities for ENH

Strategic objective 1
Improve the health and wellbeing of our population

Priority 1 Tackle health inequalities in access, experience, and outcomes.

Priority 2 Improve outcomes for adults and children and young people.

Strategic objective 2
Transform health, care and wellbeing services to meet local needs and promote independence

Priority 1 More personalised, preventative, and proactive care.

Priority 2 Embed use of population health management

Priority 3 Improved join-up of care for people with physical and mental health needs and learning disabilities

Strategic objective 3
Establish an efficient, effective and sustainable partnership

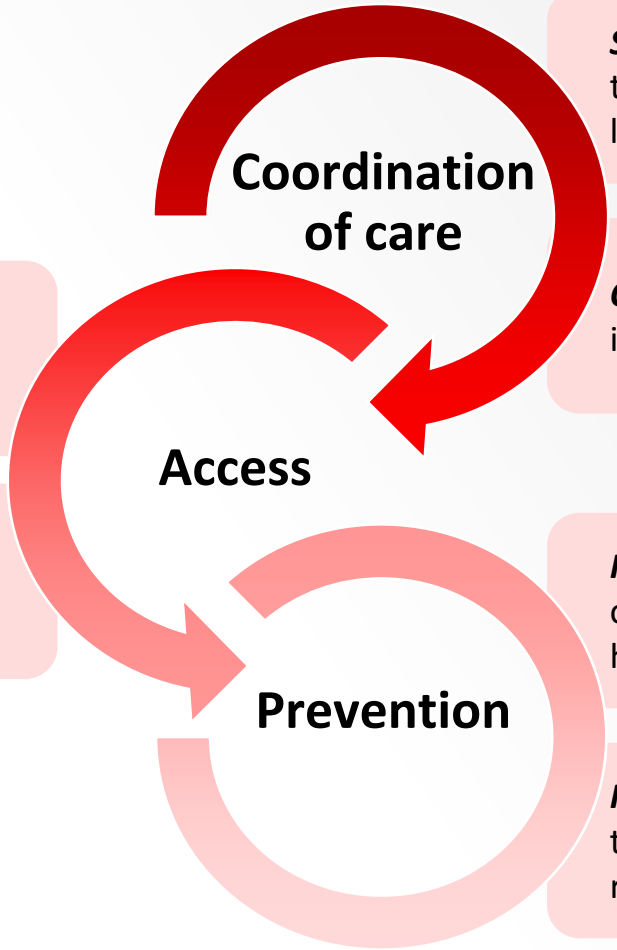
Priority 1 Ensure effective collaboration.

Priority 2 Address wider determinants of help through strong relationships with non-health partners

Priority 3 Develop an accountable, efficient, effective and inclusive partnership with the right capabilities.

2026-27 Priorities

The HCP's priorities for 2026/27 will be consistent with WHTH's clinical strategy and draw on the features of high-functioning systems



Supporting people with multiple long-term conditions to stay independent for longer, living happier, healthier lives through our proactive care model

Co-ordination of access to and through our system by improving care co-ordination and patient flow

Improving access to same day urgent care by taking a system-wide approach to balancing services, including access to general practice

Improving access to specialist opinion and diagnostics when required through joined up working between system partners

Improving uptake of preventative measures by drawing on the expertise of wider system partners such as public health

Improving people's health and wellbeing by influencing the wider determinants of health and aligning our resources to where there is greatest need

- **Partnerships that have not delivered**

- **What made it successful?**
- **What made it fail?**

- **What corrective actions can be taken when a partnership isn't delivering?**
